

HAS THIS HAPPENED TO YOU?

A broken drain cleanout in your yard has been run over by the lawnmower?

It's important not to leave open, as creatures like frogs and snakes could make their way down into your drain pipes and come out in any open drain within your home.

HERE IS AN EXAMPLE OF AN EASY FIX-

Cover on Right is the replacement for the broken cap.

CLOSEUP VIEW OF REPLACEMENT CAP

A homeowner has shared this recommendation as the style sits flush with the ground versus the one with a square top (as shown broken in the photograph).

The outcome- less chance of it being hit with the lawnmower!

Thank you to the homeowner that shared this tip!

Have a tip you want to share- let the Board know at your next association meeting or email management.
